

The Xda[®] Orbit

The latest addition to the Xda range, the Xda Orbit is a stylish, ultra slim, lightweight tablet with inbuilt Global Positioning System (known as GPS). All you need is Sat Nav software (such as CoPilot available from O2 as an optional extra) to find your way to your destination anywhere in the UK.

Also featuring the latest software, Microsoft[®] Windows[®] Mobile 5.0, the Xda Orbit allows you to send and receive Microsoft direct push email¹ in real time and you can browse the Internet wherever you are² via a clear, high quality colour screen.

With FM radio and MP3 player too, it's the perfect device for both business and personal use.

Designed for...

Customers who want a stylish, compact, lightweight device for voice, browsing and applications, in addition to Sat Nav and multimedia capabilities.

A bit more detail

- Built-in GPS Satellite Navigation Receiver, to use with Sat Nav software (purchased separately)
- MP3 player and inbuilt FM radio with six user programmable presets, uses the headset as the aerial
- 2.8" bright touch screen, stylus and 8 way trackball provide easy navigation to access the internet and browse the web
- Take pictures and shoot video through the 2.0 megapixel camera
- Supports Microsoft Windows Mobile 5.0 to provide direct push email giving you real time access to your Inbox, Calendar, Contacts and Tasks¹
- Use Outlook[®] Mobile to send and receive emails with attachments
- Quad band mobile phone - connect almost anywhere in the world.

A few great reasons to have the Xda Orbit

- Compact, lightweight and handy sized
- A range of features for both business and leisure use
- Fully integrated GPS capabilities so no need for a separate Bluetooth GPS receiver
- Includes a comprehensive range of familiar Microsoft Windows tools
- Includes Bluetooth[®] that is compatible with wireless car kits or headsets
- Full range of accessories available, including car kits, batteries, adaptors, Bluetooth headsets, protective cases.
