

# The Xda® Range

## Xda Exec

Designed to be the ultimate handheld 'laptop' device for work or leisure use and one of the most advanced Xdas in the market, the Xda Exec has everything you need to keep in touch whilst on the move.

With 3G, built-in WiFi and Microsoft Windows Mobile 5.0™, you can access the Internet and send and receive Microsoft direct push email<sup>1</sup> in real time and you can browse the Internet wherever you are<sup>2</sup> via a clear, high quality colour screen.

### A bit more detail

- Can be used anywhere there is GPRS, 3G or WLAN coverage to access the Internet and email
- Incorporates the latest Windows Mobile™ 5.0 operating system including persistent memory storage to prevent loss of user data
- Run a series of applications simultaneously to work more effectively and personalise your user experience
- Improved media player, making it easier to transfer music, videos and pictures between O2 Xda Exec and PC
- 62-key rotating QWERTY keyboard with light sensor
- Integrated 1.3 mega pixel camera and second camera for video calls
- Tri-band GPRS and 3G mobile phone – connect almost anywhere<sup>2</sup> in the world.

## Designed for...

**Busy people who want to be able to work on the move and have all the functionality of a laptop within a handheld PDA.**

### A few great reasons to have the Xda Exec

- It looks great – new look and feel
- Fantastic range of features – perfect for work and play
- Fast and reliable email and Internet access – keep on top of work and stay in touch
- Includes a comprehensive range of familiar Microsoft Windows tools, such as Microsoft Office
- 3G capability enables you to talk and use the internet or email at the same time
- Includes Bluetooth that is compatible with wireless car kits or headsets
- Full range of accessories available, including fully installed car kits, extended batteries, adaptors, Bluetooth headsets, protective cases and keyboards.

<sup>1</sup>Subject to your company's IT infrastructure, permissions and policies

<sup>2</sup>Subject to network coverage
